EDUCATION

University of California, Berkeley

Berkeley, CA

Bachelor of Science in Computer Science, GPA: 3.78/4.00

Aug. 2019 – May 2023

- Relevant Coursework: Data Structures, Algorithms, Machine Learning, Database Systems, Computer Networks, Operating Systems
- Awards: Dean's List (2020–2023), ACM ICPC Regional Participant

EXPERIENCE

Software Engineer II

June 2023 – Present

Stripe, Inc.

San Francisco, CA

- Designed and shipped a real-time fraud detection microservice in Go, reducing chargebacks by **23%** across 4M+ daily transactions.
- Refactored the payment reconciliation pipeline using Apache Kafka and PostgreSQL, cutting end-of-day processing time from 6 hours to **40 minutes**.
- Led a 3-engineer team to migrate legacy Ruby monolith endpoints to gRPC, improving p99 latency by **180ms**.
- Mentored 2 new-graduate engineers through onboarding and bi-weekly 1:1s; both received strong mid-year performance ratings.

Software Engineering Intern

May 2022 – Aug. 2022

Databricks

San Francisco, CA

- Built an interactive query cost estimator in React + TypeScript integrated into the Databricks SQL UI, adopted by **1,200+ teams** within 3 months of launch.
- Optimized Spark job scheduler heuristics, decreasing average cluster spin-up time by **17%** in benchmarks.
- Wrote comprehensive unit and integration tests (pytest, Jest) raising service coverage from 61% to 89%.

Undergraduate Research Assistant

Jan. 2021 – May 2022

UC Berkeley RISELab

Berkeley, CA

- Contributed to an open-source distributed key-value store in Rust; patches merged to main after peer code review.
- Authored benchmark suite comparing consensus algorithms (Raft vs. Multi-Paxos) at various network partition rates.

PROJECTS

SmartCart | *React, FastAPI, PostgreSQL, Redis, Docker*

Jan. 2023 – May 2023

- Built a collaborative grocery-list app with real-time sync via WebSockets; supports 500+ concurrent users in load tests.
- Implemented JWT-based auth, role management, and rate limiting; deployed on AWS ECS with a CI/CD pipeline (GitHub Actions).

NoteFlow | *Python, LangChain, OpenAI API, Pinecone, Next.js*

Aug. 2022 – Dec. 2022

- Developed an AI-powered note-taking assistant with semantic search over personal notes using vector embeddings; **800+ GitHub stars**.
- Integrated streaming LLM responses and a Retrieval-Augmented Generation (RAG) pipeline for context-aware Q&A.

TrailMapper | *Swift, MapKit, CoreLocation, Firebase*

Summer 2021

- iOS app for recording, sharing, and rating hiking trails; **2,000+ downloads** on the App Store.
- Implemented offline-first caching with CoreData so maps load without network connectivity.

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript, Rust, Java, SQL, Swift

Frameworks & Libraries: React, Next.js, FastAPI, gRPC, LangChain, Spark, Kafka, Node.js

Databases: PostgreSQL, MySQL, Redis, MongoDB, Pinecone

Cloud & DevOps: AWS (EC2, ECS, S3, Lambda), Docker, Kubernetes, Terraform, GitHub Actions, Datadog

Tools: Git, Linux, Vim, Postman, Figma, Jupyter

CERTIFICATIONS & AWARDS

AWS Certified Solutions Architect – Associate <i>Amazon Web Services</i>	Mar. 2024
1st Place, Cal Hacks 9.0 (Best Developer Tool Track) <i>UC Berkeley</i>	Oct. 2022
